
Best interest and order execution policy

Version 3, September 2021

1. Introduction

This Summary Best Interest and Order Execution Policy (“the Policy”) is provided to you (our Client or prospective Client) in accordance with the Provision of Investment Services, the Exercise of Investment Activities, the Operation of Regulated Markets and Other Related Matters Law 87(I)/2017, as subsequently amended from time to time (“the Law”). Pursuant to the Law, Key Way Investments Ltd (“the Company”) operating trading name “CAPEX.com, is required to take all reasonable steps to act in the best interest of its Clients when receiving and transmitting Client Orders and to achieve the best execution results when executing Client Orders and to comply with the principles set out in the Law when providing investment services.

By opening a trading account (Client Account) with the Company, the Client also agrees/consents to the fact that his orders will be executed outside Regulated Market (e.g., Licensed European Stock Exchange) or a Multilateral Trading Facility (e.g., European Financial Trading System).

The Company executes client Orders only on Contracts for Differences (“CFDs”) in stocks, commodities, indices, cryptos, bonds, exchange traded funds (ETFs), ThematiX and currency pairs.

2. Scope

This Policy applies to both Retail and Professional Clients (as defined in the Company’s Client Classification Policy). If the Company classifies a Client as an Eligible Counterparty, this Policy does not apply to such a client.

This Policy applies when receiving and transmitting Client Orders or executing orders for the Client for all the types of Contracts for Difference (“CFDs”) offered by the Company.

3. Best Execution Factors

The Company shall take all reasonable steps to obtain the best possible results for its Clients when receiving, transmitting and executing Client Orders and obtain the best possible results for its Clients taking into account the following factors when dealing with Clients' Orders: price, costs, speed, likelihood of execution and settlement, size, market impact or any other consideration relevant to the execution of the order. We do not consider the above list exhaustive and the order in which the above factors are presented shall not be taken as priority factor.

- a. **Price:** For any given CFD, the Company will quote two prices: the higher price (ASK) at which the Client can buy (go long) that CFD, and the lower price (BID) at which the Client can sell (go short) that CFD. Collectively, the ASK and BID prices are referred to as the Company's price. The difference between the lower and the higher price of a given CFD is the spread.

Such orders as Buy Limit, Buy Stop, Stop Loss, and Take Profit for an opened short position, are executed at ASK price. Such orders as Sell Limit, Sell Stop, Stop Loss, and Take Profit for an opened long position, are executed at BID price.

The Company's price for a given CFD is calculated by reference to the price of the relevant underlying asset, which the Company obtains from third party external reference sources (i.e., price feeders plus a fixed mark-up with added costs). The Company's prices can be found on the Company's website and/or trading platforms. The Company updates its prices as frequently as the limitations of technology and communications links allow. The Company reviews its third-party external reference sources from time to time to ensure that the data obtained continues to remain competitive. The Company will not quote any price outside the Company's operations time (see Execution Venues below) therefore no orders can be placed by the Client during that time.

If the price reaches an order such as: Stop Loss, Take Profit, Buy Limit, Buy Stop, Sell Limit or Sell Stop, these orders are instantly executed. However, under certain trading conditions it may be impossible to execute orders (Stop Loss, Take Profit, Buy Limit, Buy Stop, Sell Limit or Sell Stop) at the Client's requested price. In this case, the Company has the right to execute the order at the first available price. This may occur, for example, at times of rapid price fluctuations, if the price rises or falls in one trading session to such an extent that, under the rules of the relevant exchange, trading is suspended or restricted, or this may occur at the opening of trading sessions. The minimum level for placing Stop Loss, Take Profit, Buy Limit, Buy Stop, Sell Limit and Sell Stop orders, for a given CFD, is specified under your Trading Agreement.

- b. **Costs:** For opening a position in some types of CFDs the Client may be required to pay commission or swap fees, the amount of which is disclosed on the Company's website.

Commissions: Commissions may be charged either in the form of a percentage of the overall value of the trade or as fixed amounts.

Swap Fee: In the case of Swap Fees, the value of opened positions in some types of CFDs is increased or reduced by a daily financing fee "swap rate" throughout the life of the contract. Swap fees are based on prevailing market interest rates, which may vary over time. Details of daily swap fees applied are available on the Company's website. For all types of CFDs that the Company offers, the commission and Swap Fees are incorporated into the Company's quoted price.

The spreads for the list of CFDs can be found on the Company's website and/or the Platform(s).

It is also noted that Client Account may be charged with additional fees such as Client Account maintenance fees, found on the Company's website. Should the Company at any period of time decide not to charge such costs, it shall not be construed as a waiver of its rights to apply them in the future, with prior notice to the Client.

- c. **Speed of Execution:** The Company executes the Client Orders through its Straight Through Process (STP) model. However, the Company may execute Client Orders in CFDs as a principal to principal against the Client, i.e., the Company to be the Execution Venue (as defined in Commission Directive 2006/73/EC implementing MiFID) for the execution of the Client's Order. The Company transmits Client Orders or arranges for their execution with a third party(ies). However, the Company places a significant importance when executing Client's orders and strives to offer high speed of execution within the limitations of technology and communications links. For instance, in cases where Clients are using a wireless connection or a dial up connection or any other communication link that can cause a poor internet connection then this may cause unstable connectivity with the Company's trading Platforms resulting in the Client placing his Orders at a delay and hence the Orders to be executed at better or worst prevailing price offered by the Company.

- d. **Likelihood of Execution:** The Company transmits Orders for Execution and executes them with another party, or it may act as the counterparty. The likelihood of execution depends on the availability of prices of the market makers/financial institutions and/or the Liquidity Providers. In some cases, it may not be possible to arrange an Order for execution, for example but not limited in the following cases: during news times, trading session start

moments, during volatile markets where prices may move significantly up or down and away from declared prices, where there is rapid price movement, where there is insufficient liquidity for the execution of the specific volume at the declared price, upon restrictions that may be imposed from the Liquidity Provider, a force majeure event has occurred.

In the event that the Company is unable to proceed with an Order with regard to price or size or other reason, the Order will be either rejected or partially filled.

In addition, the Company is entitled, at any time and at its discretion, without giving any notice or explanation to the Client, to decline or refuse to transmit or arrange for the execution of any Order or Request or Instruction of the Client in circumstances explained in the Client Agreement.

- e. **Likelihood of settlement:** The Financial Instruments (i.e., CFDs) offered by the Company do not involve the delivery of the underlying asset, so there is no settlement as there would be for example if the Client had bought shares.
- f. **Size of order:** The actual minimum size of an order is different for each type of Account. A lot is a unit measuring the transaction amount and it is different for each type of CFD. Please refer to the Company's website for the value of the minimum size of an order and each lot for a given CFD type. The Company reserves the right to decline an order as explained in the agreement entered with the Client. Please refer to the Company's website for the value of the maximum volume of the single transaction.

If the Client wishes to execute a large size Order, in some cases the price may become less favorable considering the liquidity in the market. The Company reserves the right not to accept a Client's Order, in case the size of the Order is large and cannot be filled by the Company.

- g. **Market Impact:** Some factors may rapidly affect the price of the underlying instruments/products from which the Company's quoted price is derived and may also affect other factors listed herein. The Company will take all reasonable steps to obtain the best possible result for its Clients.

The Company does not consider the above list exhaustive and the order in which the above factors are presented shall not be taken as priority factor. Nevertheless, whenever there is a specific instruction from the Client, the Company shall make sure that the Client's order shall be executed following the specific instruction.

4. Execution Practices in CFDs

You are warned that Slippage may occur when trading in CFDs. This is the situation when at the time that an Order is presented for execution, the specific price showed to the Client may not be available; therefore, the Order will be executed close to or a number of pips away from the Client's requested price. So, Slippage is the difference between the expected price of an Order, and the price the Order is actually executed at. If the execution price is better than the price requested by the Client, this is referred to as positive slippage. If the executed price is worse than the price requested by the Client, this is referred to as negative slippage. Please be advised that Slippage is a normal element when trading in CFDs. Slippage more often occurs during periods of illiquidity or higher volatility (for example due to news announcements, economic events and market openings and other factors) making an Order at a specific price impossible to execute. In other words, your Orders may not be executed at declared prices. Slippage may appear in all types of accounts we offer.

It is noted that Slippage can occur also during Stop Loss, Take Profit, and other types of Orders. We do not guarantee the execution of your Pending Orders at the price specified. However, we confirm that your Order will be executed at the next best available market price from the price you have specified under your pending Order.

5. Types of Order(s) available in CFDs trading

The characterizing of an Order may affect the execution of the Client's Order. Please see below the different types of Orders that a Client can be placed:

a. Market Order(s)

A market order is an order to buy or sell a CFD as promptly as possible at the prevailing market price. Execution of this Order results in opening a trade position. CFDs are bought at ASK price and sold at BID price. Stop Loss and Take Profit orders can be attached to a market order.

b. Pending Order(s)

This is an Order to buy or sell a CFD in the future at the best available price once a certain price is reached. The Company offers the following types of Pending Orders: Buy Limit, Buy Stop, Sell Limit or Sell Stop Orders to trading accounts for CFDs.

A Pending Order is an Order that allows the user to buy or sell a CFD at a predefined price in the future. These Pending Orders are executed once the price reaches the requested level. However, it is noted that under certain trading conditions it may be impossible to execute these Orders at the Client's requested price. In this case, the Company has the right to execute the Order

at the first available price. This may occur, for example, at times of rapid price fluctuations of the price, rises or falls in one trading session to such an extent that, under the rules of the relevant exchange, trading is suspended or restricted, or there is a lack of liquidity, or this may occur at the opening of trading sessions.

It is noted that Stop Loss and Take Profit may be attached to a Pending Order. Also, pending Orders are good till cancel.

c. Take Profit

Take Profit Order is intended for realizing the profit when the financial instrument (i.e., CFDs) price has reached a certain level. Execution of this Order results in a complete closing of the whole position. The Order can be requested only together with an open market or a pending Order and it is also executed at stated prices.

This type of Order is set above the current Bid price in case of long positions and below the opening price in case of short positions. The Company's trading platform closes a long position at Bid Price, and a short position at Ask Price.

d. Stop Loss

Stop Loss Order is used for minimizing losses if the CFD price starts moving in an unprofitable direction. If the CFD price reaches the stop loss level, the whole position will be closed automatically, thus eliminating the incurrance of additional losses. Such Orders are always connected to an open position or a pending Order. They can be requested only together with a market or a pending Order. Under this type of orders, the Company's trading platform checks long positions with Bid price to meet the provisions of this order (the order is always set below the current Bid price), similarly, the platform checks. Ask prices for short positions (the order is always set above the current Ask price).

6. Best Execution Criteria

When executing client orders, the Company considers the following criteria for determining the relative importance of the Best Execution Factors referred in paragraph 3 above:

- a. The characteristics of the Client's order.
- b. The characteristics of the Financial Instruments that are the subject of that order.
- c. The characteristics of the execution venue to which that order is directed.

The Company determines the relative importance it assigns, in accordance with the abovementioned criteria, to the Best Execution Factors by using its commercial

judgment and experience in light of the information available on the market and taking into account the remarks included in paragraph 3. For CFDs, the Company assigns the following importance level to the Best Execution Factors.

Factor	Importance Level	Remarks
Price	High	We give strong emphasis on the quality and level of the price data that we receive from external sources in order to provide our clients with competitive price quotes. We do not however guarantee that our quoted prices will be at a price which is as good, or better, than one might have been available elsewhere.
Costs	High	We take all reasonable steps to keep the costs of your transactions as low and competitive, to the extent possible.
Speed of Execution	High	Execution speed and the opportunity for price improvement are critical to every trader and we repeatedly monitor these factors to ensure we maintain our high execution standards.
Likelihood of Execution	High	Even though we reserve the right to decline a Client order we aim to execute all Clients' orders, to the extent possible.
Likelihood of settlement	Medium	See relevant description in Best Execution Factors (point 3 above).
Size of order	Medium	See relevant description in Best Execution Factors (point 3 above).
Market Impact	Medium	See relevant description in Best Execution Factors (point 3 above).

Where the Company executes an order on behalf of a Retail Client, the best possible result shall be determined in terms of the total consideration (unless the objective of the execution of the order dictates otherwise), representing the price of the CFD and the costs related to execution, which shall include all expenses incurred by the Client which are directly related to the execution of the Order, including execution venue fees, clearing and settlement fees and any other fees paid to third parties involved in the execution of the order, as applicable.

For the purposes of delivering best execution where there is more than one competing Execution Venues to execute an Order for a CFD, in order to assess and compare the results for the Client that would be achieved by executing the Order on each of the execution venues (see Paragraph 9 below) that is capable of executing that Order, the Company's own commissions and costs for executing the Order on each of the eligible Execution Venues shall be taken into account in that assessment. The Company shall not structure or charge their commissions in such a way as to discriminate unfairly between Execution Venues.

7. Client's Specific Instruction

Whenever there is a specific instruction from or on behalf of a Client for the execution of an Order, the Company shall arrange – to the extent possible – for the execution of the Client order strictly in accordance with the specific instruction.

WARNING: It is noted that any specific instructions from a Client may prevent the Company from taking the steps that it has designed and implemented in this Policy to obtain the best possible result for the execution of those Orders in respect of the elements covered by those instructions. However, it shall be considered that the Company satisfies its obligation to take all reasonable steps to obtain the best possible result for the Client.

Trading rules for specific markets or market conditions may prevent the Company from following certain of the Client's instructions.

8. Execution of Client Orders

The Company shall satisfy the following conditions when carrying out Client Orders:

- a. ensures that orders executed on behalf of Clients are promptly and accurately recorded and allocated.
- b. carries out otherwise comparable Client orders sequentially and promptly unless the characteristics of the order or prevailing market conditions make this impracticable, or the interest of the Client requires otherwise.
- c. informs a Client about any material difficulty relevant to the proper carrying out of orders promptly upon becoming aware of the difficulty.

9. Execution Venues

- 9.1 Execution Venues are the entities with which the Orders are placed for final execution.

An “Execution Venue” means a regulated market (e.g., stock exchange), a multilateral trading facility, a systematic internalizer or a market maker or another liquidity provider or an entity performing in a third country a function similar to any of the abovementioned.

The Company transmits Client Orders or arranges for their execution with a third party(ies) known as Straight Through Process (STP). Such arrangement can be made to manage the Company’s risk and it shall not jeopardize the quality of execution of the Client’s order while all abovementioned best execution criteria/factors shall be followed/applied.

The Company uses other third-party Institution(s) as Execution Venues. The Execution Venues currently used by the Company is Magnasale Trading Limited, a company licensed and regulated by the Cyprus Securities and Exchange Commission (License No. 264/15), Finalto Financial Services Limited, a company licensed and regulated by the Financial Conduct Authority (Reference No. 481853) and Finalto Trading Limited, a company licensed and regulated by the Financial Conduct Authority (Reference No. 607305).

The list may be changed at the Company’s discretion by giving at least one business day prior notice to the Clients. The Company reserves the right to change its Execution Venues at its own discretion.

The Company evaluates and selects the third-party Execution Venues it collaborates with, based on a number of criteria such as (but not limited to) the following:

- regulatory status of the institution.
- the ability to deal with large volume of orders.
- the speed of execution.
- the competitiveness of commission rates and spreads.
- the reputation of the institution.
- the ease of doing business.
- the legal terms of the business relationship.
- the financial status of the institution.

9.2 The Company selects to work with those third-party venues that enable the Company to obtain on a consistent basis the best possible result for the execution of the Client’s orders.

9.3 Nevertheless, the Company is licensed to offer the Dealing on Own Account investment service and activity. Thus, the Company may act as principal, i.e., to be the Execution Venue/Counterparty for the execution of the Clients Orders.

10. Client's Consent

By entering into a Client Agreement with the Company for the provision of Investment Services, the Client is consenting to an application of this Policy on him (i.e., this Policy forms part of the Client Agreement).

11. Amendment of the Policy and Additional Information

The Company reserves the right to review and/or amend its Policy and arrangements whenever it deems this appropriate according to the terms of the Client Agreement between the Client and the Company. It should be noted that the Company will not notify the Client separately of changes, other than substantial material changes to the Policy, and Clients should therefore refer from time to time to the website of the Company at [Terms and Conditions](#) for the most up to date version of the Policy.

Clients should refer from time to time to the Company's [Quality of Execution Summary Statement](#) which is uploaded on the Company's website and is updated on annual basis.

Should you require any further information and/or have any questions please direct your request and/or questions to support@capex.com
